Summary of oversubscription criteria

Children who have an Education, Health Care Plan that names Heronsgate School will be allocated a place in accordance with national regulations.

In the event that there are more applications received than there are places available, the following criteria will be used to allocate places:

1. Children who are looked after (LAC) and all previously looked after children (PLAC) including those children who appear (to the admission authority) to have been in state care outside of England and ceased to be in state care as a result of being adopted (IAPLAC).
2. Children living within the defined area who will have a sibling still in attendance at Heronsgate School, at the time of admission.
3. Children of staff employed by the Milton Keynes Education Trust.
 - a) where the member of staff has been employed at the school for two or more years at the time at which the application for admission to the school is made; or
 - b) where the member of staff is recruited to fill a vacant post for which there is a demonstrable skill shortage.
4. Children in attendance at Milton Keynes Education Trust infant school (Kents Hill) and living in the defined area of Kents Hill School.
5. Children who live in Heronsgate School's defined area.
6. Children living outside the defined area in attendance at Milton Keynes Education Trust infant school (Kents Hill).
7. Children living outside the defined area with a sibling still in attendance at the time of proposed admission.
8. Children living outside the defined area.

In the event of oversubscription, including oversubscription within any category above, remaining places will be awarded according to the proximity of the child's main residence to the main entrance of Heronsgate School. This is measured in a straight line from the front door of the child's home to the school's main entrance gate using the council's computerised measuring system, with those living closer to the school receiving higher priority. In the event that it is not possible to establish the order of priority between two or more addresses at the same distance, then random allocation will be used. The random allocation process will be independently supervised.
